Q1.

sol.

```
import java.util.*;

public class add_num{

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.println("enter the value of first number");
        int a = sc.nextInt();

        System.out.println("enter the value of second number");
        int b = sc.nextInt();

        int sum = a+b;

        System.out.println("sum of two number is"+sum);

        sc.close();

    }

}
```

```
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> javac add_num.java
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> java add_num.java
Error: Could not find or load main class add_num.java
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> java add_num
enter the value of first number
3
enter the value of second number
4
sum of two number is7
```

Q.2

Sol.

```
import java.util.*;

public class fibonacci_series {

   public static void main(String[] args) {

      Scanner sc = new Scanner(System.in);

      System.out.println("enter the number that much fibonacci number you want \t");

       int length = sc.nextInt();

        int a = 0;

        int b = 1;

        System.out.print(a+" "+b);

        for (int i = 0; i < length ; i++) {

            int c = a+b;

           System.out.print(" "+c);

            a = b;
```

```
            b = c;

        }

        sc.close();

    }

}
```

```
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> javac fibonacci_series.java
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> java fibonacci_series
enter the number that much fibonacci number you want
5
0 1 1 2 3 5 8
```

Q.3

Sol.

```
public class name_10_time {

    public static void main(String[] args) {

        for (int i = 0; i < 10; i++) {
            System.out.println("Sunil dhayal");
        }

    }

}
```

```
PS  Focus folder in explorer (ctrl + click)  026\java\assignment_01_basic> javac name_10_time.java
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> java name_10_time
Sunil dhayal
Sunil dhayal
Sunil dhayal
Sunil dhayal
Sunil dhayal
Sunil dhayal
Sunil dhayal
Sunil dhayal
Sunil dhayal
Sunil dhayal
```

Q.4

```
import java.util.*;

public class factorial_num {

   public static void main(String[] args) {

    Scanner sc = new Scanner(System.in);
System.out.println("enter the number , you want that number factorial");
    int num =  sc.nextInt();

      int ans = 1;

     for (int i = num ; i >= 1; i--) {
         ans = ans*i;
        }
  System.out.println("factorial of given number is :\t"+ans);
  sc.close();
   }
}
```

```
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> javac factorial_num.java
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> java factorial_num
enter the number , you want that number factorial
4
factorial of given number is :  24
```

Q.7

sol.

```
public class reverse_num {

   public static void main(String[] args) {

       int num = 1234;

       int reverse_n = 0;

while (num != 0) {

   int last_num = num%10;

  reverse_n = reverse_n*10 + last_num;

    num = num/10;

}

System.out.print(reverse_n);

   }

}
```

```
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> javac reverse_num.java
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> java reverse_num
4321
```

Q.5

Sol.

```
import java.util.Scanner;

public class even_odd {
    public static void main(String[] args) {
      Scanner sc =  new Scanner(System.in);
      System.out.println("enter the number: \t");
        int value = sc.nextInt();

        if (value%2 == 0) {
          System.out.println("enter number is even");
        }else{
          System.out.println("enter number is odd ");
        }
     sc.close();
   }
}
```

```
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> javac even_odd.java
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> java even_odd
enter the number:
3
enter number is odd
```

Q.6

Sol.

```
public class largest_num {
    public static void main(String[] args) {
       int a = 4;
       int b = 9;
```

```
        int c = 1;

         if (a>b) {
           if (a>c) {
               System.out.println("A is largest one");
           }
         }else{
            if (b>c) {
              System.out.println("B is largest one");
            }else{
              System.out.println("C is largest one");
            }
         }

    }
}
```

```
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> javac largest_num.java
PS C:\Users\HP\OneDrive\Desktop\2026\java\assignment_01_basic> java largest_num
B is largest one
```

Q.8

Sol.

```
public class multiplication_table {
   public static void main(String[] args) {
        int n = 5;
       for (int i = 1; i < 11; i++) {
          System.out.println(n*i);
       }
   }
```

```
}
```

```
